## HANDHELD DIGITAL IMAGER SCANNER

### VERSATILE SCANNER BRINGS AFFORDABLE HIGH DENSITY BAR CODE SCANNING TO ELECTRONIC COMPONENT ASSEMBLY

The affordable Zebra DS6707-HD brings a new level of efficiency to electronic component manufacturing by enabling the automated capture of virtually every type of bar code utilized in electronics manufacturing. The DS6707-HD supports the complete set of high density marks common in electronics manufacturing environments, including laser etched, ink marked, chemical etched and inkjet bar codes. Tuned to address the unique challenges in electronics component assembly, the DS6707-HD scanner is optimized to accurately capture high density and low contrast marks, including black bar codes on white backgrounds; white bar codes on black backgrounds; and etched bar codes with a very low contrast tone-on-tone effect — where there is very little difference in color between the mark and the background material on which it is printed.

### ADD BAR CODE SCANNING AND IMAGING FOR COMPREHENSIVE DATA CAPTURE CAPABILITIES IN A SINGLE DEVICE

In addition to direct part marks, the versatile DS6707-HD offers support for 1D and 2D bar codes, enabling workers to scan bar codes that are printed directly on the electronic assembly as well as paper labels — with just one device. In addition, workers can easily document damaged components or assemblies in seconds with the integrated high resolution 1.3 megapixel image sensor.

### EASY TO USE

The easy-to-use device requires virtually no training — regardless of whether your workers are decoding a bar code or capturing an image. The omni-directional scan pattern allows marks to be presented at any angle. A viewfinder provides true first-time accurate point-and-shoot aiming for image capture. And the optional Intellistand provides the ability to dynamically switch between handheld and hands-free modes as needed, providing maximum application flexibility.

### RAPID RETURN ON INVESTMENT (ROI)

The rich functionality of DS6707-HD significantly reduces capital and operational expenses. Enterprises can standardize on a single device for the capture of multiple data types — including challenging direct part marks and dirty or damaged bar codes. The technology infrastructure is simplified — there is no need to purchase, manage and support additional devices, such as digital cameras and separate bar code scanners for different symbologies.

To help you protect your investment and maintain peak performance, Zebra offers Service from the Start Advance Exchange Support for the Zebra DS6707-HD. This multi-year agreement helps protect product uptime with next-business-day delivery of a replacement device. In addition, this service includes Zebra's unique Comprehensive Coverage, which includes normal wear and tear as well as coverage for internal and external components damaged through accidental breakage at no additional charge — significantly reducing your unforeseen repair expenses.

### FEATURES

#### 1.3 Megapixel imaging (1280 x 1024)

High resolution image sensor for robust image capture and bar code scanning; captures 1D bar codes down to 3 mil density and 2D bar codes down to 2mm x 2mm and as dense as 4 mils

#### Support for all major 1D, PDF, postal, 2D and DPM symbologies

Delivers application flexibility; eliminates need for multiple devices — and associated costs

#### RSM (Remote Scanner Management) Ready

Reduces total cost of ownership by enabling remote, network-based device management

#### Integrated viewfinder

Enables first time accurate aiming for image capture

#### 6 ft./1.8m drop specification, tempered glass exit window

Designed to endure the rigors of everyday use for maximum reliability and uptimes; reduces downtime and TCO

#### Multiple on-board interfaces; universal cable compatible

Easy to install; future-proof — today's scanner can connect to tomorrow's host Integrated viewfinder,
